

ONLINE TRAINING!

TRAIN ONLINE!

Delta Forensics is now offering a number of training options available in an online or distance format. These classes are designed for those who wish to gain professional knowledge on their own schedule, and at a more reasonable rate than onsite classes that require travel.

These sessions are designed for both students pursuing a degree in Forensic Science, whom wish to gain practical knowledge before entering the work force, increasing their marketability, as well as current practitioners hoping to build upon their current level of expertise.

Courses are offered in a modular format, and consist of any combination of: Recorded webinars, written exercises, practical exercises, and comparison practical exercises!

Increase your abilities in an open environment! Sessions are always available and affordable! Contact us for additional information, registration, and any special training needs you may have!
